SUMMARY

Aspiring Machine Learning Engineer skilled in Python, SQL, and PyTorch, with hands-on experience in AI system development, predictive modeling, and data-driven decision-making. Built a rule-based AI conversational agent during an AI/ML internship at SafeX Solutions, and analyzed 1,000+ banking records at Faysal Bank Limited to improve reporting accuracy in a live, regulated environment. Passionate about applying statistical rigor and scalable engineering practices to solve real-world problems.

EXPERIENCE

Safex Solutions – AI/ML Intern Jul 2026 - Sept 2026

· Built a rule-based AI Restaurant Reservation Assistant (finite state machine) for bookings, seating preferences, and real-time availability, applying modular design, input validation, and automated testing best practices.
· Collaborated within a small AI/ML team under the guidance of experienced engineers to translate real-world requirements into a functioning, end-to-end rule-based AI product.

Faysal Bank Limited – Software / IT Intern Jun 2026 - Jul 2026

· Analyzed 1,000+ internal banking records using SQL and Excel to identify operational trends and support data-driven decision-making.
· Cleaned, validated, and prepared transactional datasets for weekly branch reports, applying data analysis and visualization in a live regulated environment.
· Queried and maintained relational databases ensuring accuracy and consistency of customer account, transaction, and card records.
· Observed a Java-based statement generation application querying a backend database to produce real-time customer account statements.
· Applied information security best practices: role-based access control, data classification, and Declaration of Confidentiality.

PROJECTS

AI Restaurant Reservation Assistant *Python · AI · Rule-Based ·FSM*

· Command-line chatbot that books restaurant tables via a finite state machine and rule-based AI logic — collect guest details, recommends seating for special occasions, checks availability against a mock dataset, saves confirmed bookings to JSON, and is backed by a full automated test suite.

Fire Alarm System — Reflex Agent *Python · AI · Predictive Modeling*

· Built an AI reflex agent processing environmental sensor data (temperature, smoke) to trigger automated decisions, applying predictive modeling and goal-based reasoning.

Java Quiz Application (GUI) *Java · Swing · OOP*

· Designed a GUI quiz system with automated score calculation and structured data handling, applying OOP and event-driven architecture for a modular, maintainable codebase.

Hotel Management System *C++ · OOP · Data Structures*

· Designed a structured database schema managing customer records, bookings, and billing, applying data structures, querying logic, and file I/O for persistent storage.

SKILLS

Programming Languages: Python, SQL, Java, C/C++
Machine Learning & Data: Machine Learning, Data Analysis, Data Visualization, Statistics & Probability, Predictive Modeling
Libraries & Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Scikit-Learn, PyTorch, FastAPI
Tools & Platforms: Git, GitHub, MySQL, MongoDB, VS Code, Microsoft Excel, Windows / macOS / Linux

EDUCATION

Sukkur IBA University Aug 2024 - May 2028

Bachelor of Science in Computer Science - CGPA: 3.38 / 4.0

· Core coursework: Artificial Intelligence (AI), Machine Learning (ML), OOP, Data Structures & Algorithms, DBMS, Software Engineering,
· Collaborated on team projects applying structured problem-solving, Git version control, and software engineering practices.

CERTIFICATIONS

Google Data Analytics Professional Certificate Jul 2026

· Coursera / Google — nine-course certificate covering data cleaning, processing, analysis, and visualization using spreadsheets, SQL, Python, and Tableau.

Google Prompting Essentials Jul 2026

· Coursera / Google — four-course specialization in AI prompt design and advanced prompting techniques for data analysis and task automation.

Supervised Learning with Scikit-Learn Jun 2026

· DataCamp — applied supervised ML techniques: classification, regression, and model evaluation.

ACHIEVEMENTS

· **Prime Minister Laptop Award** — Prime Minister Youth Scheme 2025-26, Sukkur IBA University, awarded for academic excellence and outstanding performance.
